Chapter I—Farm Credit Administration

PART 10—FEDERAL LAND BANKS GENERALLY

STOCK REQUIREMENTS

Section 10.223-64 of Title 6, Code of Federal Regulations, is hereby amended to read as follows:

§ 10.223-64 *Issuance of new stock sufficient to cover existing loan; retirement of existing stock.* Where an applicant who does not own the outstanding stock in connection with the existing bank loan on the farm covered by the mortgage or contract being purchased by the bank from the Corporation desires or is required to acquire such stock or new stock in lieu thereof but cannot acquire the outstanding stock, the outstanding stock may be retired and paid off and new stock issued to the applicant and pledged in connection with the existing bank loan. The bank should require that the applicant purchase only enough new stock to collateralize the existing bank loan in the proportion of one share of stock for every \$100 or fraction thereof of the unpaid indebtedness under the existing bank loan. When stock in that amount is issued to the applicant, all other stock outstanding in relation to the existing bank loan should be retired. The Administration hereby approves the retirement of stock in such cases where it is authorized by the bank's board of directors. Where the applicant acquires no stock in connection with the bank loan, then, unless he procures from the owner of the association stock held in connection with the bank loan a power of attorney or other authorization to exercise the exclusive right to vote in connection with both loans, the applicant must agree with the association, in consideration of the bank's purchase of the Corporation asset, to forego the right to vote at any association meeting where he and the other stockholder are present, except when they agree as to which shall cast the one vote.

purpose of reconditioning for re-export and the regular immediate delivery and consumption entry bond (single entry), customs Form 7551, or warehouse entry bond, customs Form 7555, with the added condition set out below.

The amount of the bond, as prescribed in Part 25, Customs Regulations of 1943, shall be increased by an amount equal to the value of the merchandise, as set forth in the entry, in order to provide adequate security for the performance of the obligations outlined in the added condition.

For failure to comply with the added condition, the collector shall demand in writing the payment of liquidated damages in an amount equal to the value of the entire shipment, as set forth in the entry. Such demand shall be in addition to any other payment provided for under any other provision of law and regulation. The written demand shall include a statement that a written application for relief from the payment of the full liquidated damages may be filed with the collector within 60 days after the date of the demand.

Then this added condition shall be void; otherwise to remain in full force and effect.

(e) No article shall be excluded from entry under paragraph (b) hereof if there is filed in connection with the entry a certificate of an authorized representative of a Government agency that the property is owned by such Government agency at the time of importation.

(f) Within 30 days after importation any article which is excluded from entry as surplus property may be entered in bond for exportation, or for transportation and exportation, from continuous customs custody.

(g) Any article which is excluded from entry under this section shall be seized and forfeited pursuant to section 593 (b), Tariff Act of 1930, unless entered in bond within 30 days after importation for exportation, or for trans-

portation and exportation, and exported within a reasonable time thereafter.

TITLE 26—INTERNAL REVENUE

Chapter I—Bureau of Internal Revenue

Subchapter C—Miscellaneous Excise Taxes

[T. D. 5475]

PART 320—RETAILERS' EXCISE TAXES

SALES BY RETAILERS OF ARTICLES FOR RESALE AT RETAIL

Regulations 51 (26 CFR, 1941 Supp., Part 320), as last amended by Treasury Decision 5353, approved March 31, 1944, are hereby further amended by inserting immediately after § 320.22 the following:

SALES FOR RESALE

§ 320.23 *Sales for resale.* All sales of taxable articles by persons engaged in the business of selling such articles at retail are presumed to be sales at retail, unless the character of a sale as a sale for resale is evidenced either (a) by a "retailers' exemption certificate" furnished by the purchaser in the form outlined herein, or (b) by equivalent proof of exemption.

The following is the prescribed form of retailers' exemption certificate:

RETAILERS' EXEMPTION CERTIFICATE

_____, 19____
(Date)

The undersigned purchaser hereby certifies that he is engaged under the name of _____

(Name under which purchaser operates)
located at _____, in selling at retail
(Address)

articles subject to retailers' excise tax; that the article or articles specified and fully identified in the accompanying order, or on the reverse side hereof, are purchased from _____ for resale; and that

(Name of vendor)
the retailers' excise tax payable in respect of retail sales of luggage, etc., under section 1651 of the Internal Revenue Code, and in respect of retail sales of jewelry, etc., fur, and toilet preparations under sections 2400, 2401 and 2402, respectively, and for the war period under section 1030, will be reported in returns filed by the undersigned with the Collector of Internal Revenue at _____

The undersigned understands that he must be prepared to establish by competent evidence that the articles were actually purchased for the purpose stated and that the tax due thereon was paid to the Government.

It is also understood that the fraudulent use of this certificate to secure exemption will subject the undersigned and all guilty parties to a fine of not more than \$10,000.00, or to imprisonment for not more than five years, or both, together with costs of prosecution.

(Name)

(Address)

The proof of exemption considered equivalent to a "retailers' exemption certificate" is not restricted to any particular form, but must be in writing and show the name under which the purchaser is engaged in business, his business address, his intention to resell the articles at retail and pay tax thereon, and the Collector of Internal Revenue to whom the tax will be paid.

Where the certificate of exemption or equivalent proof, as outlined above, is not procured by the retailer from the purchaser prior to or at the time the retailer files his return for the month in which the sale for resale is made, the retailer must include the tax on such sale in such return. However, if the certificate or equivalent proof is later obtained, a claim on Form 843 for refund of the tax may be filed by the retailer or he may take credit upon a subsequent return, but such action must be taken within the 4-year period of limitation prescribed by section 3313. (See § 320.76.)

If it is impracticable to furnish a separate certificate or equivalent proof for each purchase order, a single certificate, or equivalent proof, covering all sales between given dates (the period not to exceed a month) will be acceptable.

The certificates of exemption or equivalent proof and proper records of invoices, orders, etc., relative to tax-free sales must be retained by the vendor selling for resale as provided in § 320.72 and must be readily accessible for inspection by internal revenue officers.

Notwithstanding that an exemption certificate or equivalent proof with respect to any sale is obtained by the vendor, the latter shall be liable for the tax if in fact the sale is at retail.

The provisions of this section apply to sales of toilet preparations in all cases except sales to operators of beauty parlors, etc. For special provisions relating to tax-free sales of toilet preparations to operators of beauty parlors, etc. see § 320.52.

PART 3290—TEXTILE, CLOTHING AND LEATHER

[Conservation Order M-328B, Schedule G, as Amended Sept. 4, 1945]

SPECIAL PROGRAM FOR MEN'S AND BOYS' WORK CLOTHING

§ 3290.120g *Schedule G to Order M-328B*—(a) *Explanation.* This schedule states the special rules in addition to those set forth in Order M-328B for manufacturers of men's and boys' work clothing to get an AA-3 preference rating for fabric to make the items listed in this schedule.

(b) *Definitions.* For the purpose of this schedule:

(1) "Men's and boys' work clothing" means any garment designed for male workers' wear while engaged in their occupations and expressly limited to the types customarily sold under the names specified in the list of items in the Preference Rating Schedule, and made in accordance with War Production Board Limitation Order L-181.

(2) "Base period" means the third calendar quarter of 1942.

(c) *Special requirements for priorities assistance.* (1) Three copies of Form WPB-4302 (and not Form WPB-3732 revised) should be filed in accordance with the rules stated in paragraph (c) of Order M-328B, except that for the third quarter of 1945 the applications must be postmarked by July 31, 1945.

(2) The base period manufacturer who files Form WPB-4302 for the third quarter of 1945 by July 31, 1945, may, as soon as he files his application, apply an AA-3 rating for the purchase of fabrics for deliveries in that quarter for incorporation into the items for which application is made. He may do so only for an item that he made in the base period and only for 70% of the quantity of fabric applied for with respect to any item. Fabric purchased under this provision shall be deducted by the manufacturer from the total yardage for which priorities assistance is ultimately granted on Form WPB-4302. If the applicant does not ultimately receive a grant of the entire quantity thus rated, he shall, upon notification of his grant by the War Production Board, immediately cancel orders for any undelivered quantities which are in excess of his

grant. In addition, a base period manufacturer must reduce the yardage of fabric he makes with ratings under this paragraph by whatever amount he gets in the third quarter of 1945 for men's and boys' work clothing with an AA-3 rating assigned under Order M-317A as amended May 10, 1945, or under Direction 16 to M-317, and must charge that amount to the yardage for which he is assigned an AA-3 rating on Form WPB-4302 for that quarter.

(3) A manufacturer who did not make in the base period the items applied for on Form WPB-4302 may not use any preference rating assigned under this order until the War Production Board has assigned him a rating on that form.

(4) A manufacturer who made items listed in the Preference Rating Schedule in the base period may not apply on Form WPB-4302 for priorities assistance to get more fabrics in any quarter than the following amount: The total yardage consumed in the base period for all items less the yardage he expects to use in the quarter for which application is made, in making men's and boys' work clothing and similar garments (such as shirts, other than white dress shirts, dungarees, battle dress, fatigues, etc.) for delivery to an agency of the U. S. Government.

(d) *Provisions in case of governmental cut-backs.* At any time during any calendar quarter, a manufacturer who has received cancellations or cut-backs on military contracts or orders placed by an agency of the United States Government or who has production facilities made available, may apply to the War Production Board on form WPB-4302 for priorities assistance to manufacture items listed in the preference rating schedule. Such applications will be approved to the extent of available materials and the need for additional production of the items applied for.

(e) *Special inventory rule.* Manufacturers who use ratings assigned under this schedule are subject to the inventory provisions of paragraph (f) (4) of

Order M-328B except that a 60-day inventory limit applies instead of a 45-day one.

(f) *Notification of unused allocations.* A person who finds that for any reason (such as increases in Army or Navy contracts) he will not place rated orders to the extent authorized on form WPB-4302 for a particular calendar quarter, or will cancel rated orders he has placed, must promptly write a letter giving notice to the Textile, Clothing and Leather Bureau of the War Production Board showing the reference numbers on his authorization. Letters must specify the quantity and kind of fabric in the same terms in which the authorization was made.

(g) *Priorities assistance for component parts.* Persons applying for priorities assistance under this schedule may apply for sewing thread in quantities needed for incorporation into the number of units for which priorities assistance is requested. Applications shall be made on form WPB-2342 filed with the Textile, Clothing and Leather Bureau, War Production Board, Washington 25, D. C. Such applications will be approved to the extent of available materials and to the extent that such allocations are made for the production of items.

(h) *Use of fabrics obtained with priorities assistance.* Beginning September 4, 1945, any person who has obtained any fabrics listed in the Preference Rating Schedule with a rating assigned under this schedule may use them to make any item listed in the Preference Rating Schedule whether or not the rating was assigned for that item.

(i) *This schedule expires September 30, 1945.* Schedule G to Order M-328B shall expire September 30, 1945.

Issued this 4th day of September 1945.

PART 3293—CHEMICALS

[Conservation Order M-131, as Amended Sept. 5, 1945]

CINCHONA BARK AND CINCHONA ALKALOIDS

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of cinchona bark

and cinchona alkaloids for the war effort, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the war effort:

§ 3293.131 (Conservation Order M-131)—(a) Definitions. For the purposes of this order:

(1) "Cinchona alkaloids" means any of the alkaloids or their salts obtained from cinchona bark whether alone or in combination with other alkaloids from cinchona bark, including, but not limited to quinine, totaquine, cinchonine, cinchonidine, quinidine, quinine sulfate, etc., and such alkaloids in standard dosage forms (pills, tablets, capsules, ampoules, etc.) or totaquine, quinine, cinchonine, cinchonidine in packages of one-half ounce or less.

(2) "Quinine" means quinine alkaloid obtained from cinchona bark and its salts and derivatives.

(3) "Cinchonine" means cinchonine alkaloid obtained from cinchona bark, and its salts and derivatives.

(4) "Cinchonidine" means cinchonidine alkaloid obtained from cinchona bark, and its salts and derivatives.

(5) "Quinidine" means quinidine alkaloid obtained from cinchona bark, and its salts and derivatives.

(6) "Totaquine" means a mixture of alkaloids obtained from cinchona bark.

(7) "Cinchona bark" means the bark obtained from the genus *Cinchona* or from the genus *Remijia*.

(8) "Anti-malarial agent" means any product or material which according to modern medical opinion is recognized as a specific for suppression, alleviation or cure of malarial infections.

(9) "Producer" means any person who produces or imports cinchona bark or cinchona alkaloids or has cinchona alkaloids produced for him pursuant to toll agreement.

(10) "Distributor" means any person who buys cinchona alkaloids for resale without further processing.

(11) "Supplier" means a producer or distributor.

(b) *Restrictions on deliveries and use.*

No person other than Defense Supplies Corporation or any other corporation organized under section 5.(d) of the RFC Act, as amended, or any duly authorized agent of such corporation, or a government disposal agency acting as such, shall deliver, accept delivery of, or use cinchona bark or cinchona alkaloids unless specifically authorized by War Production Board, on Forms WPB 2945 or WPB 2946, whichever is appropriate. However, the U. S. Army, Navy, the U. S. Maritime Commission and War Shipping Administration need not apply for authorization to accept delivery of and use cinchona bark or cinchona alkaloids, but their supplier must list the proposed deliveries, and contract numbers on his application Form WPB 2946, and such supplier shall not make delivery until authorized by War Production Board. Such authorization will also constitute authorization to those services and agencies named to accept delivery of and to use the cinchona bark or cinchona alkaloids.

(c) *Exceptions to restrictions on delivery and use.* Nothing contained in this order shall prohibit the following transactions:

(1) *Deliveries of uncompound cinchona alkaloids under toll agreement.* Any person may, without authorization from War Production Board, accept delivery of cinchona alkaloids pursuant to

toll agreement for the purpose of compounding into standard dosage forms, and thereafter redeliver the same to the owner thereof, provided the person making the delivery in the first instance has received specific authorization to use the cinchona alkaloids and retains title to such cinchona alkaloids and to the products made therefrom.

(2) *Small deliveries of cinchona alkaloids.* Any person may, without authorization from War Production Board, accept small deliveries of cinchona alkaloids for the purpose of resale to licensed physicians, veterinarians or to ultimate consumers, or for the purpose of compounding into dosage form and thereafter reselling the same in such form, provided that small deliveries do not exceed in any calendar month:

(i) 10 ounces of totaquine (uncompounded). 5 ounces of cinchonine or its salts in the aggregate (uncompounded). 5 ounces of cinchonidine or its salts in the aggregate (uncompounded). 5 ounces of quinine or its salts in the aggregate (uncompounded).

(ii) 2 ounces of quinidine or its salts in the aggregate (whether compounded or in standard dosage form), unless acceptance of delivery of this amount, taken together with such person's stock of quinidine on hand on the delivery date exceeds 4 ounces of quinidine or its equivalent in standard dosage form.

No authorization from War Production Board is required for the compounding of such cinchona alkaloids or for any subsequent delivery, acceptance of delivery, or use of such cinchona alkaloids, whether in compounded form or otherwise. However, the certificate referred to in paragraph (d) of this order is required for all small deliveries of quinidine unless the small delivery is made to an ultimate consumer on a physician's prescription as explained in paragraph (e) of this order.

(3) *Deliveries of totaquine, quinine, cinchonine and cinchonidine in standard dosage forms.* Any person may, without authorization from the War Production Board, accept deliveries of totaquine, quinine, cinchonine, cinchonidine in packages of 1/2-ounce or less or in standard dosage forms. No authorization from War Production Board is required for any subsequent delivery, acceptance of delivery or use of such cinchona alkaloids.

(4) *Delivery and use of cinchona bark on hand April 30, 1942.* Any person may deliver, accept delivery of or use, without authorization from War Production Board, any stock of cinchona bark consisting of less than 50 pounds and which was physically located at any one place on April 30, 1942.

(5) *Delivery and use of cinchona bark or cinchona alkaloids previously compounded.* Any person may deliver, accept delivery of, or use, without authorization from War Production Board:

(i) Any quinine which had been combined or compounded with other medicinal agents on or before April 4, 1942;

(ii) Any totaquine or cinchona bark which had been combined or compounded

with other medicinal agents on or before April 30, 1942;

(iii) Any quinine and urea hydrochloride (USP) or quinine hydrochloride and urethane which had been combined or compounded with other medicinal agents on or before January 9, 1943;

(iv) Any cinchonine, cinchonidine or quinidine which had been combined or compounded with other medicinal agents on or before June 19, 1942.

(v) Any anti-malarial agent manufactured on or before January 9, 1943.

(d) *Certification required.* No person shall deliver quinidine pursuant to paragraphs (c) (2), (c) (3) and (c) (5) (v) of this order except upon receipt of a certificate in substantially the form shown below signed manually by a duly authorized official or as provided in Priorities Regulation No. 7. The quantity of material delivered should be specified on the reverse side of the certificate. A certificate is not required in those cases where delivery is made to an ultimate consumer on a physician's prescription as explained in paragraph (e) of this order.

NOTE: Certificate for quinine, cinchonine, cinchonidine, or totaquine, deleted Sept. 5, 1945.

No quinidine shall be delivered pursuant to a prescription which is writ-

ten for more than fifty 3-grain tablets or capsules or for the equivalent of 150 grains of quinidine in other dosage forms. No delivery of quinidine shall be made pursuant to a prescription which is used a second time to obtain additional quantities.

(f) *Applications for authorization to accept delivery or use.* A person requiring authorization to accept delivery or to use cinchona bark or cinchona alkaloids during any calendar month shall file application on Form WPB 2945 (formerly PD-600) with the Chemicals Division, War Production Board, Washington 25, D. ¹The reporting provisions of this order have been approved by the Bureau of the Budget in accordance with Federal Reports Act of 1942.

Revised Price Schedule No. 100 is amended in the following respects:

1. Section 1306.307 is amended to read as follows:

§ 1306.307. *Definitions.* (a) When used in this Revised Price Schedule No. 100, as amended, the term:

(1) "Person" includes an individual, corporation, partnership, association, or any other organized group of persons or legal successor or representative of the foregoing, and includes the United States or any agency thereof, or any other Government agency, or any of its political subdivisions, or any agency of any of the foregoing.

(2) "Manufacturer" means a person operating a foundry or plant which produces cast iron soil pipe and fittings. Except for purposes of the records requirements of § 1306.304, the term includes, without restricting the generality of the foregoing, any manufacturer's representative, factory commission salesman, or other manufacturer's agent.

(3) "Jobber" and the term "wholesaler" means a person who purchases cast iron soil pipe for purposes of resale, normally maintains a line of pipe and fittings, and sells primarily to plumbers, contractors and industrial concerns.

(4) "Cast iron soil pipe and fittings" means cast iron soil pipe and fittings of the types listed in Appendices B and C of this Schedule.

(5) "Carload shipment," "carload sales," or "carload quantity" means a shipment or quantity of cast iron soil pipe and fittings the aggregate of which totals at least the lowest applicable minimum carload weight as specified in the established tariff of the rail carrier involved, or for which a carload rate would be paid.

(6) "Truckload shipment" means a shipment or quantity of cast iron soil pipe and fittings, the aggregate weight of which totals the highest of the following:

- (i) 10 tons, or
- (ii) The applicable minimum truckload weight permissible under existing regulations of the Office of Defense Transportation applicable to the carrier involved, or
- (iii) The applicable minimum truckload weight permissible under any State regulation applicable to the carrier involved.

(8) "Proposed site of installation" means the site of the construction operation designated by the purchaser at which the soil pipe is to be installed.

2. Section 1306.309 is amended to read as follows:

§ 1306.309. *Appendix A: Maximum prices for cast iron soil pipe and fittings—*

(a) *Base discounts.* The minimum base discount from the list prices for cast iron soil pipe and fittings described in §§ 1306.310 and 1306.311, shall be as follows:

2" to 6" extra heavy pipe.....	44½
2" to 6" medium pipe.....	39½
2" to 6" standard pipe.....	34½
2" to 6" fittings.....	29½

2" to 15" victory pipe (as described in section 1306.311).....	35½
8" to 15" pipe and fittings.....	35½

(b) *Sales by manufacturers—*(1) *Carload sales.* The maximum price for carload sales by manufacturers shall be f. o. b. the jobbing point nearest to the point of installation, computed by reducing the minimum base discount for each type and size of cast iron soil pipe and fittings as set forth in (a) above by ¼ point for each 25 cents per ton of freight based upon the lowest railroad tariff for a carload quantity from Birmingham, Alabama, to the jobbing point nearest to the proposed site of installation, and subject to the terminal discounts set forth in (3) below.

(2) *Truckload sales.* The maximum price for truckload sales by manufacturers shall be computed in the same manner as set forth in (1) above except that the manufacturer shall be permitted to add to the price so determined the difference in actual cost between the minimum truck rate from the manufacturing point and the jobbing point, or proposed site of installation, and the applicable carload rate between these points had he shipped by rail. The amount of this charge must be shown as a separate item on the manufacturer's invoice.

(3) *Terminal discounts.* Carload and truckload sales by manufacturers shall be subject to the following terminal discounts:

(1) On sales to jobbers or wholesalers: Successive discounts of 10 and 10 and 5 percent.

(2) On sales to persons other than jobbers or wholesalers: Successive discounts of 10 and 10 percent.

(c) *Less-than-carload and less-than-truckload sales by manufacturers.* (1) The maximum price for less-than-carload and less-than-truckload sales by manufacturers shall be f. o. b. point of manufacture, computed by reducing the minimum base discount for each type and size of cast iron soil pipe and fitting set forth in (a) above by ¼ point for each 25 cents per ton of freight based upon the lowest railroad tariff for a carload quantity from Birmingham, Alabama, to the place of manufacture, and subject to the terminal discounts set forth in (2) below.

(2) *Terminal discounts.* Less-than-carload and less-than-truckload sales by manufacturers shall be subject to the following terminal discounts:

(1) On sales to jobbers or wholesalers: Successive discounts of 10 and 5 percent.

(2) On sales to persons other than jobbers or wholesalers: No terminal discounts required.

(d) *Sales by jobbers or wholesalers.*

(1) The maximum price for sales by jobbers or wholesalers shall be f. o. b. jobbing point nearest to the point of installation, computed by reducing the minimum base discount for each type of cast iron soil pipe and fitting as set forth in (a) above by ¼ point for each 25 cents per ton of freight based upon the lowest railroad tariff for a carload quantity from Birmingham, Alabama, to the jobbing point nearest to the proposed site of installation, and further reduced by the terminal discounts set forth in (2) below:

(2) *Terminal discounts.* Sales by jobbers or wholesalers shall be subject to the following terminal discounts:

(1) Carload or truckload sales direct from the place of manufacture: Successive discounts of 10 and 10 percent.

(2) Less-than-carload or less-than-truckload sales or out of stock sales: No terminal discounts.

(3) On truckload sales direct from point of manufacture to proposed site of installation, a jobber or wholesaler may add to his maximum price as computed under (1) and (2) above, the actual amount collected from him by the manufacturer under the provisions of paragraph (b) (2), provided, each jobber or wholesaler shows such amount as a separate item on his invoice.

(c) *Delivery charges.* (1) On less-than-carload or less-than-truckload sales the manufacturer may add additional charges for delivering the shipment from the point of manufacture to the proposed site of installation not in excess of the actual cost of delivery from the point of manufacture to the proposed site of installation.

On all other sales by any person there may be added additional charges for delivering the shipment from the jobbing point to the proposed site of installation not in excess of the actual transportation charges paid for a shipment from the jobbing point to the proposed site of installation.

On sales by a jobber or on carload sales or truckload sales by a manufacturer where shipment is made direct from the place of manufacture to the proposed site of installation such additional delivery charge shall not exceed an amount equal to a charge for transporting a shipment of identical weight from the jobbing point to the proposed site of installation calculated at the lowest applicable freight rate for a carrier of the type actually employed in making the delivery.

If such delivery is made in a vehicle owned or controlled by the seller, the delivery charges provided for in this paragraph may not exceed the transportation charge for a shipment of identical weight calculated at the lowest applicable common railroad or motor carrier rate from the appropriate point to the proposed site of installation.

(2) The additional delivery charges provided for in (1) above may not be demanded or collected:

(i) Unless the seller has filed the document or statement which he is required to file by § 1306.304 (b);

(ii) Unless such further delivery charge is shown as a separate item on the billing or invoice;

(iii) Unless the proposed site of installation of the cast iron soil pipe and/or fittings is outside the free delivery zone or zones recognized by the seller on October 1, 1941;

(iv) If in the case of a carload sale by a manufacturer or any sale by a jobber, the delivery is made to a purchaser other than a jobber or wholesaler at the jobbing point.

(f) For the purposes of this section, the seller shall be considered as having delivered to the proposed site of installation when, in the case of a purchase from a jobber or wholesaler, or in the case of a purchase from a manufacturer by a

person other than a jobber or wholesaler, a shipment by railroad arrives at the railroad siding nearest to the site designated by the purchaser, or when a shipment by motor carrier arrives at the site designated by the purchaser.

(g) The maximum price at which a person may export cast iron soil pipe and fittings shall be determined in accordance with the provisions of the Maximum Export Price Regulation issued by the Office of Price Administration.

(1) Where the seller performs the service of wiring or otherwise bundling pipe and fittings for export shipment, an added charge of \$1.00 per ton of pipe and fittings may be made.

(h) No additions to the maximum prices established in this Appendix A may be made for treating cast iron soil pipe and fittings with tar.

(i) Credit terms more onerous than those available or in effect on October 1, 1941, shall not be imposed by the seller.

(j) All carload or truckload orders accepted as such must be priced as a carload or truckload shipment regardless of how the order is eventually shipped.

This amendment shall become effective September 7, 1945.

Issued this 5th day of September 1945.

ARTICLE I—SCOPE OF REGULATION AND PROHIBITION

SECTION 1. *Applicability of this regulation*—(a) *To what sales this regulation applies.* This regulation applies to all

sales by all persons of new passenger automobiles and their extra, special or optional equipment.

(1) *Definition of new passenger automobiles.* A new passenger automobile (called "new automobile" in this regulation) means any 1945 or subsequent model year automobile, including standard equipment, manufactured in the United States having a seating capacity of less than eleven persons which:

- (i) Has not been used; or
- (ii) Is a demonstrator; or
- (iii) Is a dealer company owned or dealer executive car.

(b) *Geographical applicability.* This regulation applies to the forty-eight states of the United States, the District of Columbia, and the territories and possessions of the United States.

SEC. 2. *Prohibition against dealing in new automobiles at prices above the maximum.* (a) No person shall sell or deliver any new automobile at a price higher than the maximum price permitted by this regulation, except as provided in section 18.

(b) No person in the course of trade or business shall buy or receive a new automobile at a price higher than the maximum price permitted by this regulation, except as provided in section 18, but if he, the purchaser, has received from the seller a written statement that the price charged is not in excess of the maximum price, and he has no knowledge to the contrary, he shall be deemed to have complied with this paragraph.

(c) No person shall agree, offer, solicit, or attempt to do any of the acts prohibited in paragraphs (a) and (b) of this section.

SEC. 3. *Relation of this regulation to other regulations*—(a) *In general.* The transactions, persons, and commodities subject to this regulation shall not be subject to any other regulation issued by the Office of Price Administration in so far as they are covered by this regulation, except as provided in paragraph (b).

(b) *Sales for export.* Export sales of the new automobiles covered by this regulation are covered by the Second Revised Maximum Export Price Regulation.

SEC. 4. *Less than maximum prices.* Nothing in this regulation prevents the charging, offering, or paying of prices lower than the maximum prices permitted by this regulation.

ARTICLE II—MAXIMUM PRICES FOR MANUFACTURERS

SEC. 5. *Explanation*—(a) *Coverage of Article II.* Maximum prices for manufacturers are established under this Article II. The word "you" refers to a person who is a manufacturer of new automobiles.

(b) *Methods to be used in determining maximum prices.* There are four methods for determining manufacturers' maximum prices, the first three of which are for use in pricing models similar to the 1942 models of the same makes, and the fourth, in pricing models of new makes or new models of established makes which are not similar to the 1942 models of the same makes.

(1) *When first pricing method is to be used.* A maximum price may be established under the first pricing method, section 6, for any new automobile in which differences in specifications, design, material or equipment do not cause its direct labor and materials costs to be below such costs of the most similar 1942 models of the same make.

(2) *When second pricing method is to be used.* A maximum price may be established under the second pricing method, section 7, for a new automobile which is substantially different from the most similar 1942 model of the same make. A new automobile is "substantially different" if, because of differences in specifications, design, material or equipment, its direct costs for labor and materials are lower or higher than such costs for the model with which it is being compared, except that the omission of a fifth tire from the new automobile shall not be considered as making the new automobile substantially different from the model with which it is compared.

If differences in specification, design, material or equipment cause direct material and labor costs of the new automobile to be lower than such costs of the model with which it is compared, the maximum price for the new automobile must be established under this section unless it is established under section 8.

(3) *When third pricing method is to be used.* Under the third pricing method, which incorporates the OPA's reconversion pricing formula, a maximum price may be established for any new automobile for which a maximum price may be established under the first or second pricing method. However, you may determine maximum prices for some models under section 8 and maximum prices for other models under section 6 or 7, whichever may be applicable.

(4) *When fourth pricing method is to be used.* Under the fourth pricing method maximum prices must be established for makes of new automobiles not previously manufactured or for models of makes of new automobiles which are not similar to 1942 models of the same makes with respect to specifications of major characteristics.

(c) *Costs to be used in determining net differences in direct labor and material costs.* In determining each net difference in direct material and labor costs due to a change in specification, design, material or equipment, use the following costs:

(1) *Material cost.* Use actual current cost whenever possible for the item of material or equipment of the new automobile that reflects a change from the similar item of material or equipment in the base period model with which the new automobile is compared and also for the item of material or equipment in the base period model. When actual current cost cannot be de-

termined for the item of material or equipment of that base period model, use your best estimate of current cost for such an item. Likewise, when actual current cost cannot be determined for the item of material or equipment of the new automobile, use your best estimate of current cost for such an item.

(2) *Labor cost.* Use labor cost based on actual current wage rates and on your best estimate of the time it would currently take to perform the operation. This procedure applies to the item of material or equipment in the base period model as well as the item of material or equipment in the new automobile.

(d) *"Highest price."* The "highest price" referred to in Article II is the highest gross price either for an automobile or its extra, special or optional equipment before any discounts or allowances, and exclusive of charges for outbound transportation, for taxes, and for handling and delivery operations. In the case of the new automobile the "highest price" is also exclusive of the charge for a fifth tire.

(e) *"Base period."* The "base period" referred to in any section in the regulation is "October 1, 1941 to October 15, 1941", except for Packard Motor Car Company and Crosley Corporation, it is "February 2, 1942".

Sec. 6. First method for determining a maximum price—(a) Method. Your maximum price under this method for each class of purchaser is the sum of the following, less the amount obtained by multiplying (1) and (2) by the respective discounts in effect in the base period:

(1) The highest price you had in effect in the base period for the most similar 1942 model of the same make; and

(2) If the new automobile is equipped with extra, special or optional equipment, the highest prices you had in effect in the base period for the most similar 1942 model extra, special or optional equipment; and

(3) The cost of transportation, if any, not to exceed the actual rail freight charge at carload rates, by the most direct route, for the transportation of the new automobile and extra, special or optional equipment, from the factory to the railroad freight receiving station nearest to the location of the purchaser; and

(4) A charge to cover federal excise taxes, at the current legal rate, on the new automobile and on extra, special or optional equipment, computed in accordance with the method you had in effect on October 15, 1941; and

(5) A charge for handling and delivery operations computed in accordance with the method you had in effect on October 15, 1941.

(b) *When maximum prices under this method may be charged.* Maximum prices determined under this method may be charged and collected without prior approval or authorization.

(c) *Report of maximum prices.* You shall furnish to the Automotive Branch, OPA National Office, Washington, D. C., a report containing a description of each model of each make of new automobile, and of its standard and extra, special or optional equipment, which you intend to

price under this section, and the dollars and cents maximum prices you may charge each class of purchaser for this model and equipment. This report shall be mailed to the OPA not later than 5 days after the first sale of the model. Each maximum price shall be broken down to show the following charges and the statement in item (6) shall be made with respect to the models included in each report:

(1) The highest price you had in effect in the base period for the most similar 1942 model of the same make; and

(2) The highest prices you had in effect in the base period for the most similar 1942 model extra, special or optional equipment; and

(3) The discounts you had in effect in the base period, the class of purchasers who received them, and for what purposes they were given; and

(4) The dollars and cents amounts of the charges for federal excise taxes on the new automobile and on the extra, special or optional equipment, and an explanation of how the charges were determined; and

(5) The dollar and cents amounts of the charges for handling and delivery operations and an explanation of these operations; and

(6) A statement that any differences in specification, design, material or equipment in the new automobile or its extra, special or optional equipment, from the most similar 1942 model of the same make or from the most similar 1942 model extra, special, or optional equipment, have not caused direct material and labor costs to be lower than such costs of the 1942 model or its equipment.

Sec. 7. Second method for determining a maximum price. A maximum price is provided in this section for a new automobile substantially different from the most similar 1942 model of the same make.

(a) *Method.* Your maximum price under this method for each class of purchaser is the sum of the following, less the amount obtained by multiplying (1), (2), (3), and (4) by the respective discounts in effect in the base period:

(1) The highest price you had in effect in the base period for the most similar 1942 model of the same make; and

(2) If the new automobile is equipped with extra, special or optional equipment, the highest prices you had in effect in the base period for the most similar 1942 model extra, special or optional equipment; and

(3) The dollar and cents amount which after the application of the above discounts will yield the dollar and cent net difference (which may be a minus amount) between the direct materials and labor costs of the new automobile and the same costs of the most similar 1942 model of the same make caused by the differences in specification, design, material or equipment between these two models; and

(4) The dollar and cents amount which after the application of the above discounts will yield the net dollar and cent differences (which may be a minus amount) between the direct materials and labor costs of the new extra, special or optional equipment and such costs of

the most similar 1942 model extra, special or optional equipment caused by the differences in specification, design, or material between such equipment; and

(5) The cost of transportation, if any, not to exceed the actual rail freight charge at carload rates, by the most direct route, for the transportation of the new automobile and extra, special or optional equipment, from the factory to the railroad freight receiving station nearest to the location of the purchaser; and

(6) A charge to cover federal excise taxes, at the current legal rate, on the new automobile and on extra, special or optional equipment, computed in accordance with the method you had in effect on October 15, 1941; and

(7) A charge for handling and delivery operations computed in accordance with the method you had in effect on October 15, 1941.

(b) *Approval of maximum price.* All maximum prices under this section shall be submitted for approval to the Automotive Branch, National OPA Office, Washington, D. C. The report in which the prices are submitted shall contain the following information (Show separately the information for extra, special or optional equipment.):

(1) A description of the new automobile being priced including make, series, model, passenger capacity and standard equipment, and of its extra, special or optional equipment; and

(2) A description of the most similar 1942 model of the same make, including make, series, model, passenger capacity and standard equipment and of its extra, special or optional equipment; and

(3) Your highest price in the base period for the most similar 1942 model of the same make and your highest prices in the base period for the most similar 1942 model extra, special or optional equipment; and

(4) The discounts you had in effect in the base period, the classes of purchasers who received them, and for what purposes they were given; and

(5) The differences between the two automobiles and between the extra, special or optional equipment in specifications; design, materials, or equipment causing differences in direct labor and materials costs, showing:

(i) for each change, the dollars and cents amount of the differences, stated separately, in direct labor cost and in direct materials cost, for both the automobiles and the extra, special or optional equipment, and

(ii) the total dollars and cents amount of the net difference in both such costs caused by all such changes; and

(6) The dollar and cents amount of the charges permitted for excise taxes, and an explanation of its computation; and

(7) The dollars and cents amount permitted for handling and delivery operations, and an explanation of such operations.

(c) *Action by OPA.* A request for approval of maximum prices under this section shall be granted or denied in an order issued by the Administrator. This order shall be issued not later than 7 days from the date the request for approval is filed with the OPA, or from the date that

all required information is filed with the OPA. In each order authorizing maximum prices there shall be stated maximum resale prices for all classes of resellers. These maximum resale prices shall reflect the differential you had in effect on November 1, 1941, between your prices and your suggested resale prices. If you did not have suggested resale prices on that date the Administrator shall establish maximum resale prices which reflect the differential between manufacturers' prices and their suggested resale prices generally in effect in the industry on November 1, 1941 for new automobiles in the same price line.

(d) *When the new maximum prices may be charged.* No maximum prices computed under this section may be charged and no payment of them may be received until the order of the Administrator authorizing the prices is effective.

Sec. 8. *Third method for determining a maximum price.* A maximum price may be determined under this section instead of under section 6 or 7. Broadly stated, this method permits you first to calculate a price increase factor reflecting legal increases since January 1, 1941, in your materials prices and basic wage rate schedules and a profit margin over costs. You then apply this factor to your 1941 model prices and make appropriate adjustments for changes in specification, design, material and equipment from your most similar 1941 model of the same make. Rules for the use of the method are stated in the following paragraphs.

(a) *How to calculate your price increase factor.* To calculate your price increase factor, take the following steps:

Step 1. Find your net total sales and total costs by constructing a composite profit and loss statement from the profit and loss statements for the fiscal year ending June 30, 1941, of all your divisions and subsidiaries which either produce or sell and distribute new automobiles, excluding profit and loss statements for divisions or subsidiaries which as a general practice are not engaged in the production or sale and distribution of new automobiles for delivery or use inside the continental United States. If you do not have divisional profit and loss statements for that year, construct a composite of your profit and loss statement and the profit and loss statements of your subsidiaries which produce or sell and distribute new automobiles, except those excluded above.

"Total costs" include the cost of labor and materials, direct and indirect, entering into factory cost, other elements of factory overhead, and selling, general and administrative expense, but do not include any amount for profit or for income and excess profit taxes.

Step 2. Apply the rules in paragraph (b) below to determine a percentage increase factor for your legal increases in materials prices since January 1, 1941.

Step 3. Apply the rules in paragraph (c) below to determine a percentage increase factor for your legal increases in basic wage rate schedules since January 1, 1941.

Step 4. Adjust your total costs as found in Step 1 by increasing the material and labor costs entering into factory cost by dollar amounts which reflect your respective percentage increase factors for legal increases in material prices and basic wage rate schedules. The result is your "adjusted total costs."

Step 5. Add to your adjusted total costs the higher of the following:

(1) The dollar amount obtained by multiplying your adjusted total costs by your average over-all percentage profit margin over cost for the years 1936-1939; or

(2) The dollar amount obtained by multiplying your adjusted total costs by 4.9%, one-half the industry's percentage over-all profit margin over cost for the years 1936-1939.

The result is your "adjusted total sales."

Step 6. Find the percentage by which your adjusted total sales exceed your total sales as found in Step 1. This percentage is your "price increase factor."

Step 7. Apply the price increase factor to your 1941 model prices according to the rules in paragraph (d) below.

(b) *How to calculate a percentage increase factor for material costs.—(1) The method to be used.* Legal increases in material prices shall be calculated by using the bill of materials for your best selling 1941 model regardless of make.

Find the price increases since January 1, 1941, for not less than 75% of the materials going into the largest selling 1941 model. Then add the dollar or cents amounts of the increases together and divide the total by the total dollar cost as of January 1, 1941 of all materials going into the model. The result is your "percentage increase factor for legal increases in materials prices."

In determining the increases make the determination separately for raw materials and other materials, and use the items of material in each case having the highest dollar values in their descending order of importance. Also use as the January 1, 1941 prices from which to measure the increases the following prices:

(i) *For raw materials,* open market prices as of January 2, 1941, for such materials; and

(ii) *For other materials,* the last contract prices prior to January 1, 1941, for representative quantities of such materials.

(2) *Definitions.* (i) "Materials" include raw materials, parts, parts components, and subassemblies and also purchased services rendered in connection with the processing of materials.

(ii) "Legal increases in materials prices" are those due to changes in the general level of materials prices. They do not include increases resulting from purchases from a more distant supplier or from a different class of supplier, or in smaller quantities, or from changes in practices as to the subcontracting of parts, parts components, subassemblies, or service operations or those resulting from any other departure from customary purchasing practices.

(3) *Materials cost increase factors.* If it should appear to the Administrator that the prices being paid to suppliers of parts or other materials are inflationary in that they are reflecting temporary and artificially high elements of cost or profit margins materially greater than were prevailing in a representative peacetime period, he may establish materials cost increase factors applicable to particular parts or other materials or groups of parts or materials. These factors so far as may be reasonable and practicable, shall be in line with the price increases which would be permitted if OPA's reconversion pricing policy were

applied to adjust the maximum prices for the parts or other materials.

Where a materials cost increase factor is established, OPA will apply it in place of the increase which you reported for the part or material or group thereof covered by the factor, regardless of whether the factor is lower or higher.

(c) *How to calculate a percentage increase factor for labor costs.*—(1) *The method to be used.* Itemize in cents amount each increase in basic wage rate schedules which has been made since January 1, 1941. (Wherever the increase is a percentage amount, multiply such percentage by the average straight time hourly wage rate of the workers affected by the increase on the date it was granted, in order to express the increase in a cents amount). Then for each increase find the percentage relationship of the factory workers covered by the composite profit and loss statement who were affected by the increase on the date it was granted to the total number of factory workers covered by the composite profit and loss statement who were employed on the date the increase was granted. Then multiply each cents increase by the respective percentage. Add the results together and divide the total by the average straight time hourly earnings to obtain the percentage increase factor for "legal increases in basic wage rate schedules." Do not include any increase in basic wage rate schedules for the types of workers whose compensation was included in general administrative and selling expenses in the period covered by the composite profit and loss statement.

(2) *Definitions.* (i) "A basic wage rate" is the single rate or established range of rates for a given job classification of workers whose wages enter into factory cost.

(ii) "Basic wage rate schedules" include all the basic wage rates and rate ranges covered by the composite profit and loss statement you are using of workers whose wages enter into factory cost.

(iii) "Increase in basic wage rate schedules." An increase in basic wage rate schedules is an increase in a single rate or range of rates applying to one or more job classifications since January 1, 1941. It does not include increases to individual employees which do not alter the job classification rate or rate ranges or to employees whose wages do not enter into factory cost. Nor shall it include any increase in basic wage rate schedules made by collective bargaining or voluntary action under the authority of Section 1 of Title IV of Executive Order No. 9599.

(iv) "Average straight time hourly earnings" are the weighted average dollar hourly earnings at straight time rates in effect during the applicable payroll periods beginning January 1, 1941, or immediately thereafter for all the workers covered by the composite profit and loss statement whose wages enter into factory cost.

(d) *How to apply your price increase factor to your 1941 prices.*—(1) *When you are pricing a new automobile not sub-*

stantially different from your most similar 1941 model. To price a new automobile not substantially different from the most similar 1941 model of the same make, follow these steps:

Step 1. To price each new automobile, increase by the price factor the highest price you had in effect on January 1, 1941, for the most similar 1941 model. Apply the increase factor separately to the highest base period prices for the most similar 1941 model extra, special or optional equipment.

Step 2. To these adjusted prices, add the charges for outbound transportation, taxes and handling and delivery operations permitted by section 6 or 7. The results, less the discounts to the particular class of purchaser which you had in effect on January 1, 1941, applied in accordance with your practice on that date, are your maximum prices for the particular model, with and without extra, special or optional equipment, to that class of purchaser.

(2) *When you are pricing a new automobile substantially different from your most similar 1941 model.* To price a new automobile which is substantially different from the most similar 1941 model of the same make, follow the steps in subparagraph (1) above, but after Step 1, take the following step:

Step 1-A. Add the dollar and cents amount which after the application of the discounts in Step 2 above will yield the net difference between the direct materials and labor costs of the new automobile and such costs of the most similar 1941 model of the same make caused by the differences in specification, design, material or equipment between the two models. If the differences in the automobile being priced cause its direct materials and labor costs to be lower than those of the 1941 model, subtract, instead of adding, the amount which after the application of the discounts will yield the net difference. Determine separately the net differences between the direct material and labor costs of the extra, special or optional equipment of the two models due to changes in specification, design or material. Increase or decrease, whichever the case may be, the highest prices for the most similar 1941 model extra, special or optional equipment by the amounts which after the application of the discounts will yield these net differences.

(e) *When maximum prices under section 8 may be charged.* No maximum prices determined under this section 8 may be charged until they are authorized in an order issued by the Administrator. An order of authorization will be issued not later than fourteen days from the date the application for maximum prices under this section is filed with OPA or from the date all required information is filed with the OPA.

(f) *How to apply for authorization of maximum prices under section 8.* You shall apply to the Automotive Branch, OPA National Office, Washington, D. C., for authorization to charge maximum prices determined under section 8. The application shall be made on OPA Form 6085-2559 or on a statement of your own design. Your own statement, however, must contain all the applicable information and in the same detail which you are required to furnish on OPA Form 6085-2559.

(g) *Maximum resale prices.* Every order authorizing maximum prices under this section will contain maximum resale prices for all classes of resellers.

Sec. 9. Fourth method for determining a maximum price.—(a) *Manufacturers' maximum prices.* Manufacturers' maximum prices under this section shall be prices in line with the general level of prices permitted by the regulation for new automobiles having similar specifications for most major characteristics. Prior to filing an application for maximum prices under this section, a manufacturer shall consult with the Automotive Branch, OPA National Office, Washington, D. C., relative to the information he should include in the application.

When manufacturers qualify for maximum prices under this section such maximum prices shall be authorized in orders issued by the Administrator. No prices under this section may be charged or collected until the orders are effective. An order under this section shall be issued not later than fourteen days from the date the application for maximum prices is filed with the Office of Price Administration or from the date complete information is filed with the OPA.

(b) *Maximum resale prices.* In the orders issued under this section, maximum resale prices shall be authorized for all classes of resellers. These maximum resale prices shall reflect in general the same differential between manufacturers' maximum prices and resellers' maximum prices that section 7 permits for new automobiles in the same price line, having similar major characteristics. However, if a manufacturer's in-line maximum price is established under this section which reflects increases authorized for other new automobiles under section 8, the resellers' prices shall be fixed at levels consistent with the standards to be provided for resellers in section 8.

(c) *When maximum prices may be charged.* No maximum prices under this section may be charged or collected until they are authorized in an order issued by the Administrator.

ARTICLE III—MAXIMUM PRICES FOR RESELLERS

Sec. 10. General explanation. Maximum prices for sales at wholesale and retail are established in sections 11, 12 and 13. These maximum prices shall remain in effect unless other applicable maximum prices for sales at wholesale or retail are authorized in orders issued under section 7, 8 or 9.

Sec. 11. Maximum prices for sales at wholesale. The maximum price for a sale at wholesale of a new automobile is the sum of the following:

(a) The list price in Appendix A for the most similar 1942 model of the same make less 75% of the retail prices on November 1, 1941 for a natural rubber tire and tube of the same size and make tire and tube that are on the automobile, less the factory recommended discount as of November 1, 1941, to the same class of purchaser (Where a manufacturer did not have a recommended discount in effect on November 1, 1941, a reseller shall use his highest price, exclusive of charges for transportation, taxes and handling and delivery operations, as of that date to the same class of purchaser for the most similar 1942 model of the same make); and

(b) A charge for extra, special or optional equipment not to exceed the manufacturer's recommended prices as of November 1, 1941, to the same class of purchaser for the most similar 1942 model extra, special or optional equipment of the same make (Where a manufacturer did not have recommended prices as of November 1, 1941, a reseller shall use his highest prices, exclusive of charges for taxes and handling and delivery operations, as of that date to the same class of purchaser for the most similar 1942 model extra, special or optional equipment); and

(c) A charge to cover transportation cost, if any, which shall not exceed the actual rail freight charge at carload rates, by the most direct route, for only the transportation of the new automobile to the railroad freight receiving station nearest to the location of the seller making delivery to the purchaser; and

(d) A charge equal to the charge made by his supplier to cover federal excise taxes on the new automobile and extra, special or optional equipment; and

(e) A charge equal to his expense for state and local taxes on the sale or delivery of the new automobile and extra, special or optional equipment; and

(f) A charge for preparing and conditioning the new automobile for delivery not to exceed the applicable charge listed in Appendix B.

SEC. 12. Maximum prices for sale at retail. The maximum price for a sale at retail of a new automobile is the sum of the following, less the amount obtained by multiplying (a) and (b) by the respective discounts in effect on November 1, 1941 to the same class of purchaser;

(a) The list price in Appendix A for the most similar 1942 model of the same make, less 75% of the retail price on November 1, 1941, for a natural rubber tire and tube of the same size and make tire and tube that are on the automobile; and

(b) A charge for extra, special or optional equipment not to exceed the manufacturer's recommended list prices as of November 1, 1941, for the most similar 1942 model extra, special or optional equipment of the same make (Where the manufacturer did not have recommended list prices as of November 1, 1941, the manufacturer's factory retail prices as of November 1, 1941, plus transportation costs determined by the method under (c); to the same class of purchaser for such equipment shall be used.); and

(c) A charge to cover transportation cost, if any, which shall not exceed the actual rail freight charge at carload rates, by the most direct route, for the transportation of only the new automobile to the railroad freight receiving station nearest to the location of the seller making delivery to the purchaser; and

(d) A charge equal to the charge made by his supplier to cover federal excise taxes on the new automobile and extra, special or optional equipment; and

(e) A charge equal to his expense for state and local taxes on the sale and delivery of the new automobile and extra, special or optional equipment; and

(f) A charge for preparing and conditioning the new automobile for de-

livery not to exceed the applicable charge listed in Appendix B.

SEC. 13. Maximum prices for sales in territories and possessions. The maximum price for the sale of a new automobile at wholesale or retail in a territory or possession of the United States shall be the maximum price permitted under section 7, 8, 9, 11 or 12, whichever is applicable, to which may be added an amount equal to the expense charged to or incurred by the seller for:

(a) Payment of territorial and insular taxes on the purchase, or sale of the new automobile or its introduction into the territory or possession, when not charged under section 7, 8, 9, 11 or 12; and

(b) Export premiums; and

(c) Boxing and crating for export purposes; and

(d) Marine and war risk insurance; and

(e) Landing, wharfage and terminal operations; and

(f) Ocean freight; and

(g) Freight to port of embarkation when not charged under section 7, 8, 9, 11 or 12.

SEC. 14. When less than a complete automobile is sold. Maximum prices under this regulation for sales at wholesale and retail are for new automobiles that are equipped at least with the customary functional and non-functional parts, and with the standard equipment filed with the Office of Price Administration by the manufacturers. If any customary functional or non-functional part or standard equipment is missing its retail price shall be deducted from the retail list price for the automobile with standard equipment that is included in the maximum price.

ARTICLE IV—PROCEDURAL AND MISCELLANEOUS PROVISIONS

SEC. 15. Certificate of Transfer. Every person when he makes a sale at wholesale or retail of a new automobile shall prepare a Certificate of Transfer, Appendix C, in accordance with the instructions in that appendix, sign it and turn it in to his local War Price and Rationing Board not later than five days from the date of sale.

SEC. 16. Notice to be posted. Every dealer who sells new automobiles at retail shall post in a conspicuous place on his premises where new passenger automobiles are offered for sale, a notice not less than 18 inches by 24 inches in size legibly stating all the following facts:

(a) The make and model of each new automobile offered for sale;

(b) The maximum price of each of the new automobiles broken down to show that

(1) Retail list price for the new automobile including standard equipment;

(2) Charge for transportation;

(3) Charge for federal excise tax;

(4) Charge for state or local taxes on sale or delivery;

(5) Charge for preparing and conditioning for delivery;

(6) In case of a reseller in a territory or possession of the United States, the charges (itemized) for insular or terri-

torial taxes, boxing and crating for export purposes, marine and war risk insurance, landing, wharfage and terminal operations, ocean freight and freight to port of embarkation.

(c) A list of extra, special and optional equipment and the maximum price for each.

(d) A statement that prices lower than maximum prices may be charged.

SEC. 17. Records and reports—(a) Records. Every person who is a manufacturer or a reseller, except a consumer, is required to keep certain records, which shall be complete and accurate, for inspection by the OPA, for so long as the Emergency Price Control Act of 1942, as amended, remains in effect. These records are:

(1) *By a manufacturer—(i) Records supporting maximum prices.* All records necessary to substantiate maximum prices under Article II of this regulation.

(ii) *Price lists and discount sheets.* Published price lists and discount sheets in effect in the base period for new automobiles or new automobile equipment.

(2) *By a reseller—(i) Certificate of transfer.* A copy of a completed Certificate of Transfer, OPA Form 6085-2559, covering the sale of every new automobile; and

(ii) *Shop records.* The shop records showing repairs and replacements made in each used car traded in and the charges at retail under applicable maximum price regulations for such repairs and replacements.

(b) *Additional or substituted records and reports.* Every person subject to this regulation shall keep such records and submit such reports including periodic financial statements, as the Office of Price Administration may from time to time require in writing, either in addition to or in substitution for records and reports required by this regulation, subject to the approval of the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

SEC. 18. Adjustable pricing. Any person may agree to sell at a price which can be increased up to the maximum price at the time of delivery.

In addition, a person may deliver or agree to deliver at prices to be adjusted upward after delivery in accordance with action taken by OPA if OPA gives him an authorization to do so. This authorization may be given when a request for a maximum price under section 7 or 8 is pending, and if the authorization is necessary to promote distribution or production and if it will not interfere with the purposes of the Emergency Price Control Act of 1942, as amended.

The authorization may be given by the Administrator or by any other official of the OPA having authority to act upon the pending request for a maximum price. This authorization will be given by order.

SEC. 19. Licensing. The provisions of Licensing Order No. 1, licensing all persons who make sales under price control, are applicable to all sellers subject to this regulation. A seller's license may be suspended for violations of the license or one or more applicable price schedules or

regulations. A person whose license is suspended may not, during the period of the suspension, make any sale for which his license has been suspended.

Sec. 20. Evasion. It shall be a violation of this regulation to charge a price above the applicable maximum price in connection with any sale of a new automobile, either alone or in conjunction with any other consideration even though the price increase appears only indirectly.

The following is an illustrative list of the things a reseller is not permitted to do. A reseller is not permitted to require the purchaser, as a condition of the sale or transfer of the new automobile, to make payment over a period of time; to require him to finance the purchase through any particular lending agency; to require him to purchase any equipment, accessories, repairs, parts, or services so as to increase the total compensation above the new automobile maximum price; to require him to purchase any other commodity or service; or to require him to make payment in whole or in part by exchanging, transferring or trading in any other vehicle, product or commodity. Where there is an exchange transfer or trade-in in connection with a sale, it is a violation for the reseller, to give the purchaser an allowance for the vehicle, product or commodity exchanged, transferred, or traded in, which is less than its reasonable value.

Furthermore, the reseller is prohibited from providing for the purchase of the new automobile by a lessee under a rental contract at an agreed valuation which together with the amount paid for the rental is higher than the applicable maximum price at the time the rental contract is entered into, and from making the terms and conditions of sale more onerous to purchasers than they customarily have been except to the extent allowed by this regulation. However, the OPA upon written request may grant permission to any dealer subject to this regulation to change his credit terms, where such change is necessitated by orders issued by, or at the request of, the United States Government.

It shall also be a violation for any person to charge, pay or receive a finder's fee or other compensation in connection with the procurement of a new automobile where the finder's fee or other compensation plus the purchase price for the new automobile exceeds the permitted maximum price, except that this prohibition shall not apply to the case of a bona fide employer-employee relationship between a reseller generally engaged in the business of selling new automobiles and an employee, of the type of employee generally considered by the motor vehicle retail trade to be a new automobile salesman.

SEC. 21. Enforcement. Persons violating any provision of this regulation are subject to the criminal penalties, civil enforcement actions, proceedings for suspension of licenses and suits for treble damages provided for by the Emergency Price Control Act of 1942, as amended.

Sec. 22. Petitions for amendment. Any person seeking a modification of any provision of this regulation may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1 issued by the Office of Price Administration.

Sec. 23. Definitions. When used in this regulation the term:

(a) "Dealer" means any person other than a manufacturer who is generally engaged in the business of selling new automobiles.

(b) "Manufacturer" means one of the following:

(1) Any person who produces a new automobile; or

(2) Any person who sells a new automobile under his own brand or trade name.

(c) "Person" includes an individual, corporation, partnership, association, or any other organized group of persons, or legal successor or representative of any of the foregoing, and includes the United States or any agency thereof, or any other government or any of its political subdivisions, or any agency of any of the foregoing.

(d) "Reasonable value of a used car traded in on a new automobile" for the purposes of this regulation, means the amount determined by subtracting the charges for repairs and replacements at retail under applicable maximum price regulations needed to place the car traded in in good operating condition as defined in section 7 (b) of Maximum Price Regulation 540 from the lower of the following figures:

(1) The applicable "as is" price for the used car permitted by Maximum Price Regulation 540; or

(2) The fair market value of the top grade used car of the same make, model, body type, passenger capacity and wheel base sold "as is" to a customer by the class of seller to which the seller belongs.

(e) "Reseller" means a seller who is not a manufacturer of the new automobile he is selling.

(f) "Sale" includes sales, dispositions, exchanges, and other transfers and contracts and offers to do any of the foregoing. It includes conditional sales and sales under rental contracts, lease agreements or other agreements. The term "sale", "seller", "selling", "purchaser" and "purchasing" shall be construed accordingly.

(g) "Sale at retail" is either a sale by any class of reseller to a consumer or a sale made by a consumer to any class of purchaser.

(h) "Sale at wholesale" is a sale which is made to a reseller by any class of reseller except a consumer.

(i) "Same class of purchaser" refers to the practice adopted by the seller in setting different prices for new automobiles sold to different purchasers or kinds of purchasers (for example, Government Agency, public institution, dealer, consumer) or for purchasers located in different areas or for different quantities or under different conditions of sale.

(k) "Similar model" means an automobile which has the same use as the new automobile being priced, affords the

purchaser fairly equivalent serviceability, and belongs to a type which would ordinarily be sold in the same price line. In determining the similarities of automobiles, differences in style or design which do not affect use or serviceability, or the price line in which the automobiles have been or will be sold, shall not be taken into account.

(l) "Standard equipment" means equipment which the manufacturer has stated to the Office of Price Administration to be standard equipment.

(m) "Substantially different." A new automobile is "substantially different" if because of differences in specification, design, material or equipment its direct costs for labor and materials are lower or higher than such costs for the 1942, or 1941 model with which it is compared, except that the omission of the fifth tire from the new automobile shall not be considered as making it substantially different from the model with which it is compared.

APPENDIX A—LIST PRICES OF SIMILAR 1942 MODEL YEAR PASSENGER AUTOMOBILES

These list prices are to be used by a reseller in determining maximum resale prices under section 11, 12, or 13 when the manufacturer has maximum prices under section 6. When a manufacturer is authorized by an order issued by OPA to charge maximum prices under section 7 or 8, resellers shall be authorized in the same order to charge new maximum resale prices based on the new maximum prices of the manufacturer. When new maximum resale prices for resellers are so authorized, the applicable prices in this list will no longer have any effect.

PART 1312—LUMBER AND LUMBER PRODUCTS

[RMFR 293, Amdt. 9]

STOCK MILLWORK

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Revised Maximum Price Regulation 293 is amended in the following respects:

1. Section 1 (a) is amended to read as follows:

(a) On and after September 21, 1943, regardless of any contract or other obligations no person shall sell or deliver and no person shall buy or receive any stock millwork for direct mill shipment or for retail shipment at prices higher than the maximum prices fixed by this regulation and no person shall agree, offer or attempt to do any of these things.

2. Section 2 (a) is amended to read as follows:

(a) *Products covered by the regulation.* This regulation covers woodwork items referred to in the appendices when such items are made either wholly or in large part from lumber cut from the following woods: Ponderosa pine (*Pinus ponderosa*), Idaho pine (*Pinus monticola*), sugar pine (*Pinus lambertiana*), Northern or Northeastern pine (*Pinus strobus*), Southern pine, including shortleaf pine (*Pinus echinata*), Loblolly pine (*Pinus taeda*), slash pine (*Pinus caribaea*), such longleaf pine (*Pinus palustris*) as contains less than six annular rings per inch and less than one-third summerwood, or any other pine species known commercially as "Southern pine", California redwood (*Sequoia sempervirens*) (except on sales of redwood millwork items by manufacturers subject to the provisions of Maximum Price Regulation 253). This regulation also covers veneered doors with hollow or solid cores made of any species of lumber (except fir, larch, spruce or hemlock) or insulating board.

This regulation also covers stock millwork specialties not specifically priced in Appendices A to E and G to K, manufactured wholly or in part from Ponderosa pine (*Pinus ponderosa*), Idaho pine (*Pinus monticola*), sugar pine (*Pinus lambertiana*), Northern or Northeastern pine (*Pinus strobus*). These specialties include but are not limited to the items listed below:

Stock frames that cannot be priced from List 8-A:

Ornamental entrance frames
Complete casement sash and window units, (including frames)
Louvre frames
Complete gable frame and sash units
Overhead garage doors
Porch work

Lock-joint or mitered trim, KD or set up
Mantels, China or corner closets and breakfast nooks
Ironing boards
Telephone and medicine cabinets
Sectional kitchen units in the white
Disappearing stairways
(All to be affixed to and become a permanent part of the building.)

These specialties do not include softwood mouldings, except mouldings which are part of lock-joint or mitered trim.

The appendices of this regulation mention the titles of several millwork and glass lists. These publications are more fully described as follows:

(1) "Standard Woodwork Lists, catalog No. 40" means the document with that title corrected to March 1, 1941 published by the Pinney Printing Company, Clinton, Iowa, and the supplemental lists, based on the Modular Standards, to Catalog No. 40, as incorporated in Appendix N.

(2) "Standard Pine Frames, Catalog No. 8-A" means the document with that title published by the Pinney Printing Company, Clinton, Iowa.

(3) "Design Book No. 25" means the document with that title published by Universal Catalog Bureau, Dubuque, Iowa.

(4) "Jobber's 'A' Light Glass List of August 15, 1938" means the document with that title copyrighted by the National Glass Distributors' Association.

(5) "8000 series Standard Moulding Book" means the 8000 series Standard Moulding Book, Fourth Edition, published in 1940 by Shattock and McKay Company, Chicago, Illinois.

(6) Illustrations, design layouts and specifications as shown in "National Modular Standard for Ponderosa Pine Wood Windows and sash W. S. S. 45".

3. Subparagraph (2) of section 2 (b) is amended to read as follows:

(2) *Retail sales.* This regulation covers all retail sales. For the purpose of establishing a retail price, a retail sale is any sale, except a direct mill sale, made to an ultimate consumer.

4. Paragraph (a) of section 3 is amended to read as follows:

(a) The maximum prices on carload sales of stock millwork and stock millwork specialties are set out in Appendices A to E (sections 17 to 21, inclusive), Appendices G to K (sections 23 to 27, inclusive) and Appendices M to O (sections 29 to 31, inclusive). These ceiling prices are stated as f. o. b. mill prices with full freight allowed. This means that where shipment is by rail the seller must allow the buyer all rail charges (including taxes on the charges) which are paid by the buyer. Where shipment is by truck the seller must allow the buyer all trucking charges (including taxes on the charges) which are paid by the buyer. If the seller pays for the transportation he does not have to allow any freight.

5. Section 9 is amended to read as follows:

Sec. 9. Maximum prices for retail sales. The maximum price for a retail sale of a millwork item covered by this regulation (other than combination doors) shall be the sum of the following:

(a) The seller's maximum price for the sale of the item fixed by the General Maximum Price Regulation; and

(b) The amount by which the seller's July 1945 acquisition cost of the item delivered to his warehouse would exceed his March 1942 net acquisition cost of the item if the item had been purchased from a supplier of the same class in the same quantities as in March 1942.

If in March 1942 the seller bought from different classes of suppliers or in different quantities, he may add only the increase in the maximum prices of that class of suppliers which in the period January 1 to March 31, 1942, made the largest total shipments to him. No addition may be made because of cost increases resulting solely from purchasing from a more distant supplier, or from a different class of supplier, or in smaller quantities.

6. In section 5, paragraph (a) is amended to read as follows:

(a) *What this section covers.* This section applies to any item covered by this regulation for which a maximum price cannot be determined under any other section of the regulation.

7. A new section 31, Appendix O is hereby added to read as follows:

Sec. 31, Appendix O: Maximum prices for miscellaneous stock millwork—(a) Purpose of this appendix. From time to time authorization will be issued for special prices under section 5 of this regulation for items covered by this regulation which cannot be specifically priced under one of the other appendices. Whenever appropriate these special price authorizations will be published in this appendix.

(b) *Maximum prices for combination screen and storm sash.* Listed below are certain manufacturers of combination screen and storm sash and description of the products of each manufacturer for which maximum prices have been approved by the Office of Price Administration. However, the manufacturer named, and the products described in connection with each are not necessarily the only manufacturers or products for which maximum prices have been approved by the Office of Price Administration.

ANGEL NOVELTY CO., FITCHBURG, MASS.

Maximum prices on sales of combination storm sash and screens, of the following specifications, are set forth below:

PART 8302—PRIORITIES OF GOVERNMENT AGENCIES AND STATE OR LOCAL GOVERNMENTS

[SPB Reg. 2, Order 1]

EXEMPTION FROM THIS PART OF FOOD, DRUGS, COSMETICS, AND TOILETRIES PURCHASED BY THE QUARTERMASTER CORPS

The War Department has reported that it has large supplies of branded items of property of the types designated on Schedule A attached hereto, purchased for assembly in ration kits to be sent overseas, and for other uses. So much of this property as is no longer needed by the quartermaster must be declared surplus in the immediate future.

The Department of Commerce, as disposal agency, has applied to the Surplus Property Board for the exemption of these types of property from the requirements of this part on the ground that it is impracticable and uneconomical to require its disposal according to such requirements.

The Department of Commerce, as disposal agency, is hereby authorized to dispose of to the original manufacturers the types of property owned by the War Department and designated on Schedule A attached hereto without regard for the provisions of this part, provided that such property shall be sold at not less than the original cost to the government, f. o. b. shipping point.

Order No. A-1 under Revised Maximum Price Regulation 194 is amended in the following respects:

1. Section 1 (c) is amended to read as follows:

(c) *What geographical areas are covered.* This order is limited in its applicability to certain specified areas which are designated by regions.

Region A referred to in this order includes the 2nd and 4th Judicial Divisions, the coastal towns on Bristol Bay and the city of Anchorage. "Judicial Divisions" refers to the four district court and recording divisions of the Territory of Alaska and their boundaries established by Chapter XII, Article I, section 1091, Compiled Laws of Alaska, 1933.

Region B referred to in this order comprises the city of Ketchikan.

2. Section 2 is amended to read as follows:

Sec. 2. *How to figure your ceiling prices under this order.* (a) (1) If you are a retailer in Region A, your ceiling price for any garment listed in section 9, Appendix A, shall be your net invoice cost thereof plus a markup of 85% on such cost (this calculation can be easily made by multiplying the net invoice cost by 1.85).

(2) If you are a retailer in Region B, your maximum price for any women's coat or suit listed in section 9 (a) and (b), Appendix A, shall be your net invoice cost thereof plus a markup of 85% on such cost. Your maximum price for any other garment listed in section 9, Appendix A, shall be your net invoice cost

(2) "Supplier" means a manufacturer or wholesaler. Your ceiling prices for garments purchased from another retailer are established under this order by section 3.

(3) Do not include as part of your "net invoice cost" any commission (including but not limited to a resident buyer's commission), service, premium, transportation or any other charge not specifically provided for in this order.

This amendment shall become effective October 1, 1945.
